

SLOVAK UNIVERSITY OF AGRICULTURE IN NITRA

Peter MASSÁNYI, Marcela CAPCAROVÁ,
Norbert LUKÁČ, Grzegorz FORMICKI

BASIS OF PATHOLOGY

(Repetitorium)

2017

Authors: **prof. MVDr. Peter Massányi, DrSc.** (0.40 AQ)
Department of Animal Physiology
Faculty of Biotechnology and Food Sciences
Slovak University of Agriculture in Nitra

doc. Ing. Marcela Capcarová, PhD. (0.40 AQ)
Department of Animal Physiology
Faculty of Biotechnology and Food Sciences
Slovak University of Agriculture in Nitra

prof. Ing. Norbert Lukáč, PhD. (0.40 AQ)
Department of Animal Physiology
Faculty of Biotechnology and Food Sciences
Slovak University of Agriculture in Nitra

doc. Dr. hab. Grzegorz Formicki, PhD. (0.40 AQ)
Department of Animal Physiology and Toxicology
Institute of Biology, Faculty of Geography and Biology
Pedagogical University in Cracow, Poland

Reviewers: **prof. MVDr. Ján Danko, DrSc.**
Department of Anatomy, Histology and Physiology
University of Veterinary Medicine and Pharmacology in Košice

prof. RNDr. Monika Martiniaková, PhD.
Department of Zoology and Anthropology
Faculty of Natural Sciences
Constantine the Philosopher University, Nitra

Approved by Rector of Slovak University of Agriculture in Nitra
on februar 14, 2017 as Textbook for the Students

This textbook was financially supported by the KEGA project 006/SPU-4/2015.

ISBN 978-80-552-1635-5

Preface

Pathophysiology is a convergence of pathology with physiology. Pathology describes conditions typically observed during a disease state, whereas physiology is the biological discipline that describes processes or mechanisms operating within an organism. Pathology describes the abnormal or undesired condition, whereas pathophysiology seeks to explain the physiological processes or mechanisms whereby such condition develops and progresses. Pathophysiology can also mean the functional changes associated with or resulting from disease or injury.

Pathophysiology is a large subject. It is divided to General and Special Pathophysiology. Both terms are explained in this text material. Authors wanted to be attractive and intriguing in this material. So they tried to make the information more digestible by organizing the text into sections using useful space for students to complement other knowledge or for better explanation of some terms. Students can create their own text book.

Content

Pathology	5
Health and disease	7
Causes and development of disease	14
Inflammation	21
Fever	26
Pain	28
Regressive and metabolic changes	31
Blood	40
Alterations of tissue fluids circulations	47
Tumours	49
References	59
