Sources Used for Practice.....	89

INTRODUCTION

Has it ever happened to you that you found yourself hopeless and clueless in learning and using English grammar? We will not be lying if we say that the answer is “yes”.

One thing is to learn grammar in traditional way through exercises that drill a single grammatical structure or combine several structures. Another way is to practice grammar with the help of oral exercises. Speaking in front of unknown people can be frustrating, especially when you have not had enough practice. Even speaking in front of people that you know very well might cause problems and can be hard. It requires a lot of courage and confidence.

Your vocabulary might be excellent, or you can be an expert in the use of English specific of professional vocabulary but once you are not confident in grammar your performance leads you into problems.

This textbook covers only limited grammatical structures adequate to B1 and B2 level. The textbook consists of 14 main chapters dealing with different tenses or structures. Every main chapter contains subchapters that discuss the issue of grammatical phenomena in details. We tried to explain every issue as simple as possible. At the end of the chapter, you find *Let's talk* part that offers ideas and tasks to practice grammar. The book is supplemented with unique photographs by Nina Kellerová. For more photos you can visit www.nutrilogist.com or Instagram: @travelaniac

We dedicated the book to all students who want to acquire or improve English grammar in the easiest way as possible or just want to brush up on their knowledge. We hope you will find the book interesting and enjoy learning.

Well, wishing you good luck and have fun.
