PREFACE

Dear students of subjects focused on grape quality and wine, and generally on viticulture (grapevine growing) and viniculture (winemaking, enology) this study literature is intended just for you.

This literature is a source of information on how to make a quality, faultless, competitive wine. If you manage the theory, it is assumed that you will apply yourself in the winemaking practice. This means you won't learn from your mistakes. On the contrary, you will avoid mistakes. If a mistake occurs, you can remove it.

Quality is the ability of product to satisfy the specified and expected requirements of the customer. Generally, it means a collection of relevant features and characteristics that are the subject of evaluations aimed at determining whether or not a product or service meets the purpose of its use.

Read the text chronologically and with understanding. It is necessary to understand each single technological operation. Omitting or underestimating any key operation can cause irreparable mistakes, damage, and qualitative and economic loss.

The biotechnology of wine production has been working for more than three thousand years. Even nowadays, the miracle of fermentation by yeast or bacteria tends to be untamed and spontaneous. It is an advantage if we are able to understand, purposefully evoke, control and manage it.

Consumer demands are increasing. Quality is taken for granted. Classical procedures are and will remain the basis of winemaking practice, but it is essential to know and use the latest theoretical knowledge, modern technological equipment and have adequate qualifications. In such a composition, success will definitely come.

Note: we introduce some concepts bilingually, mainly regarding product labeling and legislation, so that the reader can better understand national terms.

We wish you many pleasant moments and success in getting to know the phenomenon of wine.

Authors

CONTENT

1. HEALTH AND CULTURAL ASPECTS OF MODERATE WINE CONSUMPTION	11
1.1 PATHOLOGICAL ASPECTS OF IMMODERATE CONSUMPTION OF ALCOHOLIC BEVERAGES....	13
1.2 ABSORPTION AND METABOLISM OF ETHANOL.....	13
1.2.1 Examples of consumption of received calories through physical activity	15
1.2.2 Wine labelling according to caloric (energy, nutritional) value.....	16
1.2.3 Labelling of wine substances ingredients (substances).....	17
2 HISTORY OF GRAPEVINE GROWING AND WINE PRODUCTION	17
3 VITICULTURE AND WINE PRODUCTION IN THE SLOVAKIA AND THE CZECH REPUBLIC	20
3.1 CURRENT RULES FOR VITICULTURE AND WINE PRODUCTION	22
3.1.1 Legal rules of viticulture in Slovakia	24
3.1.2 Basic legislative terms in viticulture	25
3.1.3 Categories of traditional terms of wines with the predicate according to the sugar content of the grapes	27
3.2 TRACEABILITY OF THE ORIGIN OF THE INGREDIENTS USED FOR THE WINE PRODUCTION	28
3.2.1 Production batch (LOT).....	28
3.3 VITICULTURE AND VINICULTURE OF IMPORTANT PRODUCTION COUNTRIES IN EUROPE	28
3.4 THE RULES OF WINEMAKING IN THE NEW WORLD	31
3.5 LOW-INTERVENTION (CRAFT / AUTHENTIC) WINES	32
4 THE PROCEDURES OF PRODUCTION AND QUALITY ASSURANCE OF GRAPES AND WINE.	33
4.1 TYPES AND SYSTEMS OF MUST AND WINE ANALYSIS	33
4.1.1 Errors in physical-chemical analyses	36
4.1.2 Goal – flawless grapes and wines	37
4.1.3 The importance of the correct choice of term and method of grape harvesting	39
4.2 METHOD OF GRAPE HARVESTING.....	42
4.2.1 Mechanical harvesting of grapes by harvester.....	42
4.2.2 Manual harvesting of grapes into containers.....	43
4.2.3 Manual harvesting of grapes into boxes	44
4.2.4 Entry of the vineyard into grape production.....	44
4.2.5 Examples of yield management in the vineyard in 4th to 20th year after planting.....	45
4.3 DESTEMMING AND CRUSHING GRAPES	45
4.4 PRODUCTION OF WHITE AND ROSÉ WINE – MASH MACERATION AND PRESSING	47
4.4.1 Pre-fermentation cryomaceration.....	48

4.4.2 Targeted oxygenation of mash and must.....	49
4.4.3 White and rose wine production - obtaining of the liquid part (must) from the mash	53
4.5 CLARIFICATION OF MUST FOR WHITE AND ROSÉ WINE PRODUCTION	54
4.5.1 Methods of must clarifications.....	56
4.6 CONTROL AND ADJUSTMENT OF THE SUGAR CONTENT IN MUSTS	57
4.6.1 Rules for adjustment of sugar content in mash, must and calculations	58
4.7 PRODUCTION OF RED WINE	61
4.7.1 Pre-fermentation and fermentation maceration of mash	61
4.7.2 Carbonic maceration of red mash	62
4.7.3 Technology of red wine production by heating - mash heating (thermovinification)	64
4.7.4 Fermentation and pressing of fermented red wine	65
4.8 ENZYMES IN WINE PRODUCTION TECHNOLOGY	66
4.9 ALCOHOLIC FERMENTATION.....	67
4.9.1 Controlled fermentation with the use of a pure culture of wine yeasts.....	68
4.9.2 Preparation of a yeast starter culture of active dry wine yeast	69
4.9.3 Spontaneous fermentation of must and mash.....	70
4.9.4 Influence of fermentation temperature on the aroma of white and rose wine	71
4.9.5 Self-clarification of the wine	72
4.10 ACIDITY OF MUST AND WINE	72
4.10.1 Volatile acids in wine	73
4.10.2 MALOLACTIC FERMENTATION.....	74
4.10.3 Other methods of biological degradation of malic acid	77
4.10.4 Chemical deacidification of must (wine)	78
4.11 OXIDATION-REDUCTION PROCESSES IN FERMENTING WINE.....	81
4.12 COLLOIDS IN WINE	82
4.12.1 Protein haze in wine	83
4.13 WINE RACKING.....	84
4.13.1 Techniques of wine racking	85
4.14 FINING OF WINE	86
4.14.1 Principles of wine fining.....	87
4.14.2 Technological aids used for fining of wine	88
4.14.3 Tests to determine the dose of fining agent and the effectiveness of fining.....	93
4.15 STABILIZATION OF WINE	95
4.15.1 Crystals (crystalline deposits) in wine and prevention of their occurrence	97

4.15.2 Crystalline stabilization of wine by protective colloids	98
4.16 PRODUCTION OF SPARKLING, SEMI-SPARKLING AND AERATED SPARKLING WINES	99
4.16.1 Technological process of sparkling wine production	99
4.16.2 Types of liqueurs, process of liqueur production, dosage	101
4.16.3 Classic method of sparkling wine production.....	102
4.16.4 Production of sparkling wine by the Charmat method	103
4.16.5 Production of sparkling wine by the Transvals method (transverse method).....	105
4.16.6 Production of sparkling wine by the method of primary fermentation – ASTI.....	105
4.16.7 Production of semi-sparkling wines	106
4.16.8 Production of aerated sparkling wines.....	107
4.16.9 PET – NAT.....	107
4.17 PRODUCTION OF TOKAJ WINES	108
4.17.1 Designation of Tokajský výber (Tokaj selections) according to the quantity of used botrytised berries (cibebas) and number of tubs.....	111
4.17.2 Tokaj association	112
4.17.3 Tokaj varietal wines Furmint, Lipovina and Yellow Muscat	112
4.17.4 Tokaj bottle.....	113
4.18 PRODUCTION AND MATURATION OF WINES IN WOODEN BARRELS	113
4.18.1 Oak wood for the production of barrique (barrique barrels).....	113
4.18.2 Chemical composition of oak wood	114
4.18.3 Tanning (toasting) of barrels	114
4.18.4 Maturation of wine in barriques	115
4.18.5 Alternative use of wood in wine production	116
4.18.6 Sur lie and bâtonnage wine production technology	117
4.19 PRODUCTION OF WINES FROM GRAPES WITH A SUGAR CONTENT ABOVE 25 °NM	118
4.19.1 Harvesting and processing of overripe grapes	120
4.20 WINE FILTRATION.....	120
4.20.1 Types of filtrations	121
4.21 HYGIENE AND SANITATION IN WINERY OPERATIONS	123
4.21.1 Treatment of barrels after microbial contamination	123
4.22 FINALIZATION OF THE WINE	124
4.22.1 HACCP (Hazard analysis and critical control points).....	124
4.22.2 Glass bottle closures.....	126
5 PURPOSE AND PRINCIPLES OF USING SULPHUR DIOXIDE IN WINE PRODUCTION.....	127

5.1 POSITION OF SULPHUR DIOXIDE IN WINE TECHNOLOGY	127
5.1.1 Free (effective) sulphur dioxide.....	128
5.1.2 Bound sulphur dioxide.....	128
5.1.3 Total sulphur dioxide	128
5.2 METHODS OF APPLICATION OF SULPHUR DIOXIDE.....	128
5.2.1 Sulphurization by burning of solid sulphur.....	128
5.2.2 Sulphurization with potassium and sodium SO ₂ salts in powder form	129
5.2.3 Sulphurization with pure SO ₂ in liquid and gaseous form	130
5.2.4 Sulphurization with aqueous solutions and combined preparations containing SO ₂	130
5.3 LIMITS OF SULPHUR DIOXIDE	130
5.3.1 Labelling of the content of SO ₂ and other allergens on the consumer packaging of wine ...	131
5.3.2 Histamine in wine	132
5.4 PRINCIPLES OF SULPHURIZATION OF MUSTS AND WINES	132
5.5 POSSIBILITIES OF SO₂ DOSES RESTRICTION IN WINE PRODUCTION	134
6 METHODS OF ANALYSIS OF THE QUALITATIVE PARAMETERS OF MUST AND WINE.....	135
6.1 IMPORTANT SUBSTANCES IN GRAPES AND WINE	136
6.1.1 FTIR analysis of musts and wines	142
6.1.2 Nuclear magnetic resonance	144
6.2 MICROBIOLOGICAL CONTROL OF WINE	144
7 WINE FAULTS AND FLAWS, THEIR PREVENTION AND CORRECTIVE MEASURES	145
7.1 WINE FAULTS	145
7.1.1 Browning of wine	146
7.1.2 Sulphur off-odours (reductive wine faults, volatile sulphur tones)	147
7.1.3 Mould taste.....	150
7.1.4 Cork taint	150
7.1.5 Yeast lees taint.....	151
7.1.6 Non-typical wine aging (atypical ageing – ATA)	151
7.2 WINE FLAWS	152
7.2.1 Wine refermentation.....	152
7.2.2 Flor (film)	153
7.2.3 Brett – bretty wines	154
7.2.4 Vinegar taint (acetic acid, volatile acidity).....	155
7.2.5 Mousiness (mousy taint, mice).....	157
7.2.6 Lactic and mannitol fermentation	157

7.2.7 Mucilage	158
7.2.8 Butyric acid taint (butyric acid fermentation, butter fermentation).....	158
7.2.9 Bitterness of wine.....	159
7.2.10 Geranium (geranium flavour).....	159
8 WINE MATURATION	160
8.1 WINE AGING POTENTIAL	160
8.1.1 Importance of temperature during wine aging in the bottle	162
8.1.2 The importance of light during the maturation of wine in the bottle.....	162
8.1.3 The importance of aromas and smells during the maturation of wine in the bottle.....	163
8.1.4 Storage of wine in the archival wine cellar.....	163
9 LABELLING OF WINE PRODUCTS.....	163
9.1 LABELLING OF WINES ON THE CONSUMER PACKAGING.....	164
9.1.1 Designation of still wines according to the content of residual sugars.....	166
9.1.2 Designation of sparkling wines according to the content of residual sugars.....	167
9.1.3 Labelling of wine composition.....	168
10 SENSORY EVALUATION OF GRAPES AND WINE	168
10.1. SENSORY EVALUATION OF TABLE GRAPES	168
10.2 SENSORY EVALUATION OF WINE	171
10.2.1 Evaluation of wine during certification	171
10.2.2 Evaluation of wine at competitions.....	171
10.2.3 Twenty-point evaluation system according to Buxbaum.....	172
10.2.4 The hundred-point system of the International Union of Oenologists	173
10.2.4 Vedel's penalty system for wine evaluation	175
10.2.6 Evaluation of results in the evaluation of wines at competitions	176
10.3 RISKS AND DEVIATIONS ACCOMPANYING SENSORY EVALUATION.....	177
10.4 CERTIFICATE OF EVALUATOR	178
11 PROCESSING OF BY-PRODUCTS FROM GRAPES AND WINE AND PRODUCTION OF PRODUCTS FROM THEM	179
11.1 GRAPE JUICE / MUST	179
11.2 VERJUS	180
11.3 WINE OIL	180
11.4 VINEGAR	181
11.5 GRAPE AND WINE JELLY	182

11.6 DISTILLATES FROM WINE AND BY-PRODUCTS.....	182
11.6.1 Brandy and Cognac	184
12 SCENARIO OF THE WAY TO WINE SUCCESS	185
13 REFERENCES.....	186

Management of grape and wine quality

Authors: doc. Ing. Štefan Ailer, PhD.
Ing. Eduard Pintér, PhD.
